

ADDING EXTERNAL CONTENT TO A PAGE

When you have set up your page, you can include blocks to pull in external content such as RSS feeds, external media or other third-party sites into your page.

Click on: Portfolio

Click on : Pages

1. Edit the page that you want add the external feed to

The screenshot shows the Mahara user interface. At the top, there is a navigation bar with tabs: Dashboard, Content, Portfolio, Groups, and Administration. Below this is a sub-navigation bar with links: Pages, Collections, Shared by me, Shared with me, Export, and Import. The main content area is titled 'Pages' with an information icon. It includes a search bar with the placeholder text 'Search: (Title, description, tags)' and a dropdown menu showing '|Title, description, tags'. Below the search bar is a 'Sort by:' dropdown and a green 'Search' button. To the right of the search bar are two buttons: 'Create page' and 'Copy a page'. Below the search bar is a 'Results' section containing a list of pages:

Results	
Dashboard page Your dashboard page is what you see on the homepage when you first log in. Only you have access to it.	
Profile page Your profile page is what others see when they click on your name or profile picture.	
A day in the life	 

You will see the following page.

2. Click on the External button down the left hand side to expand the menu.

Display page Share page Edit content Edit layout Edit title and description

This area shows a preview of what your page looks like. Changes are saved automatically.
Drag blocks onto the page to add them. You can then also drag them around the page to change their position.

- You will need to get the embed code of the item that you want to put into your page. (E.g. Youtube video you will need to click on **share** and copy the embed code that it creates).
- Go back into Mahara and drag and drop the External Media icon onto your page.
- Give your External media block a title and paste the embedded code link into the URL field. Click on Save.

External media: Configure

Fields marked by '' are required.*

Block title

URL or embed code*

Paste the **embed code** or the **URL** of the page where the content is located.
Embed code containing <iframe> tags is allowed from the following sites:

URLs from the following sites are allowed:

The following **embed services** for embedding content are supported:

Width

Height

Width and height fields are only used for URLs. If you have entered embed or iframe code above, you need to update the width and height within the code itself.

Retractable

Select to allow this block to be retracted when the header is clicked.

[Remove](#)

6. Your video will embed into the page. Once the play button is clicked, the video will start playing
